The Future Is Today: The Horizon Report in the Classroom

Ruben R. Puentedura, Ph.D. President, Hippasus rubenrp@hippasus.com

The NMC's Horizon Project is an ongoing research project that seeks to identify and describe emerging technologies that will likely have a significant impact on education. Each edition of the Horizon Report introduces six emerging technologies or practices that are likely to enter mainstream use in the educational community within three adoption horizons over the next one to five years.

Make sure to have a good mix of technologists, **Select Team** teachers, leaders in the group. Ask group members to submit links to materials **Generate Research** of interest, with brief **Database** commentary. e.g. "What technologies should schools be actively **Present Research** looking for ways to Question(s) apply?" Ask group to expand **Review Research** database, commentary, **Materials** with question(s) in mind. Ask group members to **Generate Answer Set** submit answers to question(s). For a set of N answers: give each member sqrt(N) First Pass Rankings tokens; each distributes tokens between chosen answers. Pick top sqrt(N) answers **Create Short List** with most total tokens – this is the short list. If M answers are desired: give each member M **Second Pass Rankings** tokens; each distributes tokens between chosen short list answers. Writing team integrates top M answers with **Produce Report** research materials to produce report.

The Process In Your School
